

Haute Autorité de Santé (HAS)

Francia

The HAS works to ensure that care and support at every stage of life are safe, effective and tailored to each individual. It evaluates health technologies from a clinical and health economic perspective; makes recommendations for health, social and medico-social professionals, in order to optimize and harmonize their practices and organizations; is responsible for measuring and improving the quality of care and patient safety in healthcare facilities and primary care settings, as well as the quality of support provided in social and medico-social establishments and services.
