

Nederlands Huisartsen Genootschap (NHG, Dutch College of General Practitioners)

The Netherlands

The NHG is the professional and scientific organization for general practitioners in the Netherlands. It aims at improving the quality of primary healthcare. For that, the NHG creates evidence-based clinical guidelines and standards that are followed by Dutch GPs in their daily practice. It also facilitates medical education, training, and research in the field of general practice. This way, the NHG helps in the application of science in practice.
