

Qatari Ministry of Public Health (Qatari MoH)

Qatar

The Ministry of Public Health of Qatar is the government authority responsible for public health policy, regulation, and stewardship of Qatar's healthcare system. It develops national health strategies, regulates healthcare providers and professionals, oversees public health initiatives, and coordinates healthcare delivery across the country. One of the Ministry's major initiatives is the National Clinical Guidelines (NCG) Development Program, which aims to standardize evidence-based clinical practice across Qatar's healthcare system.
