

Institute for Health Technology Assessment and Research (IETSI)

Peru

The IETSI is the decentralized body of the Social Health Insurance, responsible for the evaluation of health technologies for their incorporation, suppression, use or change in the institution; and in turn it is in charge of proposing the norms and strategies for scientific and technological innovation; in addition to promoting and regulating scientific research in the field of health; developing and approving the clinical practice guidelines in the institution and implementing the pharmacovigilance and technovigilance system.
