

Ministry of Health of North Macedonia (Macedonian MoH)

North Macedonia

The Macedonian MoH is the government body responsible for developing, implementing, and overseeing health policy and the public healthcare system in North Macedonia. It operates under the Government of North Macedonia and is responsible for ensuring access to healthcare, regulating health services, and protecting public health. The Ministry develops and publishes national clinical guidelines and protocols for a wide range of medical conditions, often in collaboration with national expert committees and professional medical societies. These guidelines aim to standardize healthcare delivery across the country and promote evidence-based clinical practice.
